

Summer 2018 Year 1 'All Creatures Great and Small'

As Historians, we will be exploring the life of the important British scientist, Charles Darwin. We will learn stories about his life and create a timeline of important events. We will look at evidence and ask questions to help us find out how Charles Darwin grew from a curious boy, who liked to collect objects from the natural world, into an important Scientist. Maybe we too can grow to become Scientists, Zoologists and Explorers?! We will also look at the different ways that Charles classified animals which will link to our work as Scientists.

In Science, we will be exploring the natural world and the animals that inhabit it. We will look at the similarities and differences between animals and learn how to group different species. Our work on animals will be supported by exciting trips to our local area and Colchester Zoo where we will see the different animals up close.

In Literacy, we will write non-fiction reports about animals we have seen and base much of our fiction work on animal stories. As Geographers, we will explore the layout of the zoo and create our own zoo maps. As Artists, we will explore how to make prints which will link to our work on animal footprints.
