

'You Are What You Eat' Year 6 Spring 2018

As **Scientists** we will be learning about the properties of different food groups and the benefits of eating healthily. We will also be studying how parts of the human body work - focusing particularly on the circulatory system - and will learn about the functions of various organs.

Through our work in **DT**, we will use various techniques to create mainly savoury dishes. We will be investigating seasonality of products with the intention of growing produce which can be used later on in the year.

Using our **Geographical Skills**, we will investigate food miles and the effect our carbon footprint has on our environment.

As **Artists** we will be developing our printing skills. From a starting point of healthy lifestyles, we will be exploring different techniques to add layers of colours to create our own interpretation of what being healthy means to us.
